An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In accordance with MPEP 1302.04, the following obvious error has been corrected: On page 5, line 8 of the specification, "since" has been deleted to correct an error in sentence structure.

The patent to Shimizu et al discloses a sewing machine comprising a thread cassette having a thread accommodating cavity in which a supply of thread is stored and a cassette mount to which the thread cassette is detachably attached. Odermann et al discloses a sewing machine comprising a thread cassette detachably attached within the machine body.

The following is an examiner's statement of reasons for allowance:

Claim 1 and its dependent claims are allowed because claim 1 specifically requires a sewing machine comprising detachment operating member operated so that a thread cassette is detached from a cassette mount and a thread tension control controlling a thread tensioner so that the thread is set at a predetermined tension when the detachment operating member has been operated.

Claim 7 and its dependent claims are allowed because claim 7 specifically requires a sewing machine comprising a cassette detector detecting a thread cassette having been attached to a cassette mount and a thread tension control controlling a

Art Unit: 3765

thread tensioner so that the thread is tensioned a predetermined period of time after detection of the thread cassette by the cassette detector.

Claim 9 is allowed because claim 9 specifically requires a thread tension control program executed by a computer provided for a sewing machine, accomplishing the function of controlling a thread tensioner so that the thread is set at a predetermined tension when a detachment operator has been operated.

Claim 10 is allowed because claim 10 specifically requires a thread tension control program executed by a computer provided for a sewing machine, accomplishing the function of controlling a thread tensioner so that the thread is tensioned a predetermined period of time after detection of a thread cassette having been attached to a cassette mount by a cassette detector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
